

MANMOHAN PATTNAIK

Java Software Engineer | Spring Boot & Microservices | Enterprise Banking Systems

D.O.B – 28/08/2000 | Bhubaneswar, India | +91-9337615662 | pattnaikmanmohan373@gmail.com | linkedin.com/in/manmohan-pattnaik

PROFESSIONAL SUMMARY

Java Software Engineer with over 2+ years of experience building secure, high-availability microservices for enterprise banking clients. Promoted from Associate to Software Engineer I within a year for consistent delivery on authentication, escrow management, and integration workloads. Hands-on with Spring Boot 3.x / Java 21 modernization, OAuth2 security, and REST/SOAP integrations across distributed systems. Seeking to bring backend system design and cloud-native engineering skills to a growth-focused engineering team.

CORE TECHNICAL SKILLS

- **Languages:** Java 8/17/21, SQL, XML, JavaScript, TypeScript
- **Backend:** Spring Boot, Spring Security, Spring Data JPA, Hibernate, Spring Authorization Server
- **Microservices:** Spring Cloud Gateway, Eureka, Config Server, REST APIs, SOAP Web Services
- **Security:** OAuth2, LDAP Authentication, Token Introspection, Role-Based Access Control (RBAC)
- **Frontend:** Angular, HTML5, CSS3
- **Database:** Oracle, MySQL, PostgreSQL
- **Tools & DevOps:** Git, Maven, Docker, Postman, IntelliJ IDEA, VS Code, Eclipse

PROFESSIONAL EXPERIENCE

Interland Technology Services Private Ltd.

Software Engineer II

July 2024 – Present

Project: **Enterprise Escrow Management System (EMS)** — Java, Spring Boot, Angular, Oracle DB, Oauth2.0, Microservices

- Built and maintained 12+ Spring Boot and Spring MVC microservices powering core banking workflows — authentication, escrow management, reporting, notifications, and transaction processing — serving 4 enterprise banking clients.
- Designed RESTful APIs and SOAP-based integrations connecting banking applications, middleware, and external systems, applying microservices API management practices and reusable service patterns to streamline integration development.
- Led migration of core enterprise services to Spring Boot 3.x and Java 21, resolving Jakarta EE compatibility issues and modernizing Spring Security and Spring MVC configs across 7+ legacy modules with zero production downtime.
- Configured and optimized Spring Cloud Gateway for centralized routing and secure inter-service communication, improving request-routing reliability across the distributed microservice architecture.
- Implemented backend business logic using Spring Data JPA, Hibernate, and native SQL, applying performance tuning and query optimization techniques to improve data access efficiency for banking operations.
- Implemented Angular login and authentication workflows, integrating frontend modules with Spring Boot APIs and environment-specific configurations.
- Triaged and resolved production incidents spanning integration issues across REST/SOAP services, middleware communication, request validation, and backend business logic.

Enterprise Workspace — Personal Project

Java 21 · Spring Boot · Angular · PostgreSQL · Docker

- Architecting a multi-tenant workspace platform using Spring Boot microservices and Angular, applying enterprise design patterns from client projects.
- Implementing JWT auth; containerizing with Docker and preparing AWS deployment.

EDUCATION

Master of Computer Applications (MCA) - SGPA: 8.64

Ajay Binay Institute of Technology (ABIT), Cuttack

Sep 2022 – Apr 2024

CERTIFICATIONS
